

Join the Smart Hearing™ revolution

The ReSound Smart™ app helps your clients experience Smart Hearing the way it should be – whether they are talking to friends, out running on a windy day, or streaming sound from the TV. It's time to change the conversation. It's no longer about the limitations associated with wearing hearings; it's about the possibilities gained by wearing one of the world's smartest devices – and controlling it from your wrist.

We've made hearing aids as smart as they can be. Now we're making hearing aid control as smart as it should be.

It's time to experience Smart Hearing™

The ReSound Smart™ app is the first hearing aid app for Apple Watch. It gives your clients seamless control – whether they are talking to friends, out running on a windy day, or streaming sound from the TV. It's time to change the conversation. It's no longer about the limitations associated with wearing hearings; it's about the possibilities gained by wearing one of the world's smartest devices – and controlling it from your wrist.

We've made hearing aids as smart as they can be. Now we're making hearing aid control as smart as it should be.
